

Project Report

| Criterion   | Learning Outcome   | Fail   | 3  | 2ii   | 2i  | 1  |
|---|--|--|--|---|---|--|
| [C1] The report presents a justification and rationale for the project work in context of other work and a survey of the relevant literature and research relating to requirements. Weight: 30% | [LO3] evidence research in the problem domain  | The project report includes a sparse investigation of the context/literature/other similar products as a justification for adoption of the project and its requirements. Supporting sources are merely an addition to the presentation and not contextualised. | The project report includes an investigation of the context/literature/other similar products as a justification for adoption of the project and its requirements. The investigation is sparsely supported by use of alternate sources, few of which are contemporary. | The project report includes an investigation of the context/literature/other similar products as a justification for adoption of the project and its requirements. The investigation is supported by some use of alternate sources, some of which are contemporary. | The project report includes an in-depth investigation of the context/literature/other similar products as a clear justification for adoption of the project and its requirements. The investigation is supported by some use of contemporary sources. | The project report includes an in-depth investigation of the context/literature/other similar products as a clear justification for adoption of the project and its requirements. The investigation is supported by authoritative use of contemporary sources. |
| [C2] The report presents a detailed account of the design and implementation undertaken within the project. Weight: 40%   | [LO1] apply practical and analytical skills in the design and implementation of a non-trivial set of project goals | The report's chapters on the design and implementation work undertaken are insubstantial and lack sufficient detail. The work discussed is trivial.  | The report's chapters on the design and implementation work undertaken are weak and lack relevant detail. The work discussed is of poor quality and unambitious.   | The report's chapters on the design and implementation work undertaken are insubstantial and lack sufficient detail. The quality of the design and implementation discussed is good and reflects the achievement of some non-trivial goals.                         | The report's chapters on the design and implementation work undertaken are substantial and sufficiently detail. The quality of the work discussed is very good and non-trivial.   | The report's chapters on the design and implementation work undertaken are substantial and sufficiently detail. The quality of the work discussed is excellent and non-trivial.  |
| [C3] The report presents a discussion of the results achieved and an evaluation of the deliverables produced. Weight: 20%   | [LO4] prepare a detailed report which evaluates a project solution.  | The report's discussion of the results achieved and evaluation of deliverables produced is insufficient detailed.  | The report's discussion of the results achieved and evaluation of deliverables produced is weak and lacks relevant details. The results achieved are poor.   | The report's discussion of the results achieved and evaluation of deliverables produced is sufficiently detailed and uses some evaluation criteria. The results achieved are good.  | The report's discussion of the results achieved and evaluation of deliverables produced is sufficiently detailed and employs evaluation criteria. The results achieved are very good.   | The report's discussion of the results achieved and evaluation of deliverables produced is comprehensive and sufficiently detailed using an appropriate set of evaluation criteria. The results achieved are excellent.  |
| [C4] The report presents a critical reflection on the project process, the student's overall achievements, and identifies future work. Weight: 10%  | [LO2] critically evaluate and reflect on the process of undertaking an individual project.                         | The report includes little in the way of appraisal of the project process.   | The report includes a cursory appraisal of the project process that indicates the lessons learnt during the course of the project, an evaluation of the process, overall achievements and future work.   | The report includes an appraisal of the project process that indicates the lessons learnt during the course of the project, an evaluation of the process, overall achievements and future work. Some aspects are likely to have sparse coverage.                    | The report includes a critical appraisal of the project process that indicates the lessons learnt during the course of the project, an evaluation of the process, overall achievements and future work.   | The report includes a critical and comprehensive appraisal of the project process that indicates the lessons learnt during the course of the project, an evaluation of the process, overall achievements and future work.                                      |
